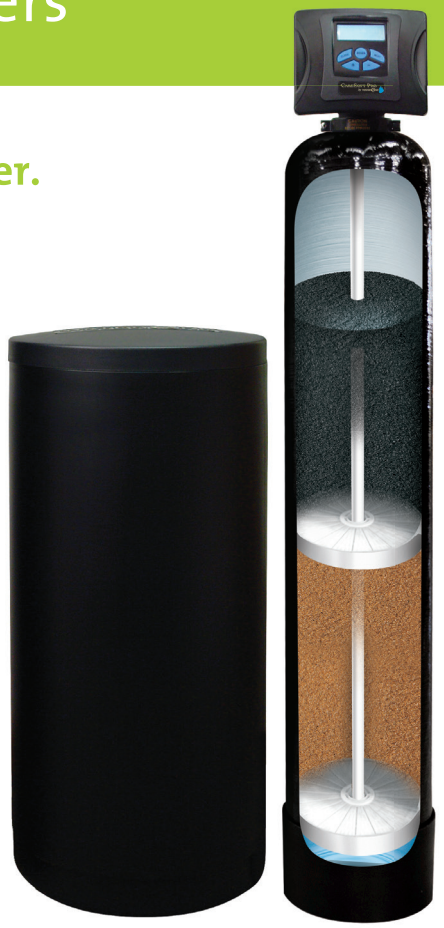
WATERCARE®
Making water good for life.

CareSoft Pro® RC Softeners



The perfect solution for city water.

Our CareSoft Pro RC models have the ability to utilize dual-chamber technology to combine two medias into one unit, eliminating the need to install multiple systems.

The CareSoft Pro RC can handle removing hardness as well as taste and odor issues, such as chlorine, associated with city water. Our high-performance resin and activated carbon configuration will filter and soften your water in a single product.

The system is designed to be environmentally-friendly while safeguarding your household plumbing and appliances, improving taste and eliminating unwanted odors. The result is the quality water you need for your home.

Efficiency is in the details.

W.E.T. WATER EFFICIENT TECHNOLOGY

Water Efficient Technology is our latest breakthrough in water treatment. W.E.T. is a series of patented features to reduce the amount of water and salt used.

- Regenerates with up to half the amount of water as a traditional system
- Does not waste salt during regeneration
- Salt monitor to notify when more salt is needed *(Optional)*
- Savings history screen keeps track of how much you save

No other water treatment solution can compare in features or performance to our W.E.T. features exclusive to WaterCare products. Put the most efficient system on the market in your home to save you water, salt, and money.

Consolidate your solution.

Every component, feature, and innovation of the CareSoft Pro RC softener has been designed to bring the highest quality, most efficient water to you and your family. CareSoft Pro RC components are certified for compliance with NSF/ANSI 61.

1 Exclusive Technology

- Deep cleaning regeneration only when necessary
- Exclusive features insures consistent water quality
- Vacation Mode to prevent unnecessary regenerations
- Only one internal moving part for easy maintenance
- Battery back-up
- Equipped with **W.E.T.**
  - **Proportional Brining:** uses less salt *(Available on Upflow Units Only)*
  - **Proportional Regeneration:** uses less water
  - **Alternate Regeneration:** keep the system running at peak performance
  - **Salt Monitor Add-On:** triggers alarm when salt levels are low
  - **Savings History Screen:** shows how much it saves

W.E.T. WATER EFFICIENT TECHNOLOGY

2 Activated Carbon

- Filters unwanted tastes and odor
- Reduces chlorine from municipal water

3 High-Performance Resin

- Powerful and durable media
- Reduces the minerals that cause hard water
- Undergoes rigorous quality control testing

4 Low-Maintenance Brine Tank

- Built-in safety float
- Heavy duty, corrosion-free material
- Fills with soft water which reduces cleaning
- Dry salt storage

Making good water for your life.

MODEL		CSPRC-1054(U)[1]	CSPRC-1354(U)[1]
[2]Capacity: (Grains/Lbs. NaCl)	Maximum	32,000 @ 15.0	48,800 @ 21.0
	Medium	28,400 @ 9.0	44,400 @ 15.0
	Minimum	23,600 @ 6.0	35,400 @ 9.0
Amount of Resin Media (Cu. Ft.)		1.0	1.5
Amount of Carbon Media (Cu. Ft.)		.5	1.0
Maximum Water Hardness (GPG)		75	100
[3]Maximum Iron (PPM)		1.0	1.0
[5]Peak Flow Rate (GPM @ P-PSI)		15.6 @ 15.0	20.4 @ 15.0
Continuous Flow Rate (GPM @ P-PSI)		9.7 @ 7.5	13.2 @ 7.5
Water Pressure Range (PSI) 25-100		25-100	25-100
Water Temp. (°F)		33-100	33-100
Electrical Requirements (volts-hertz)		110-50/60	110-50/60
Pipe Size		1"	1"
Total Dimensions:	Media Tank and Valve	10"W x 62"H	13"W x 62"H
	Brine Tank	18"W x 33"H	18"W x 40"H

[1] Upflow unit are indicated by a "U" after the model number. i.e. CSPRC-1054U

[2] All CareSoft Pro RC water conditioners are factory preset at medium salting.

[3] Iron removal may vary depending on form of iron, pH and other local conditions. On waters that are pre-chlorinated, or where other pre-oxidation occurs, an iron precipitate can form that is too small to be filtered.

[4] Unit not tested for capacity at these peak flow rates. Water quality may vary.
