Ion Pro® Air Filters

A unique solution for unique needs.

Ion Pro air filtration systems are designed to be the most versatile filtration solution available. Whether you need to remove rust stains, odor, or foul tastes, there is an Ion Pro for your home.

WaterCare® uses a unique air-induction process that oxidizes dissolved iron, manganese, or sulfur into solid particles. This greatly enhances the effectiveness of the filtration process for an efficient and environmentally-friendly system.

Your water is unique, so choose a filtration system that is customized to your needs. You can be confident that you have the proper solution to fix your water problem once and for all.

System Features:

- Environmentally safe — no chemicals
- "Inchworm" — our patented air release technology
- Easily programmed for optimum performance
- Advanced history and diagnostic screens
- Extremely low cost operation
- Includes battery back up
- All components are certified NSF/ANSI 61 compliant

Every home deserves the right filtration system to provide good quality water. As your professional WaterCare dealer, we will custom-engineer the precise home filtration system to fix your needs.

Prevent Bacteria with Ozone*

- Automatically cleans unit
- Chemical-free, environmentally safe
- LED light to indicate system operation
- Audible notification when service is required

*Optional attachment. Not compatible with birm systems.

How It Works

Nuisance water comes with a variety of different problems. Our WaterCare Air filters can be customized with the media that best fits your unique water. See the media options below for available solutions.

The system will clean itself using only air and water to backwash and flush the system of any contaminants. The rugged control valve handles high flow rates without dropping household water pressures — such as times when showers, toilets, and faucets are all in use.

Inch Worm is an adjustable cycle that allows the control valve to slowly "inch" its way into backwash, allowing air to escape slowly instead of in one big rush. This slow release virtually eliminates the thrashing of drain lines or noisy discharge of air to the drain when the system first initiates the backwash cycle.

See how it works!
Visit WaterCare.com to watch the cycle process for Ion Pro systems.

Water treatment inspired by your lifestyle.

We may recommend a mixture of medias, depending on your unique water conditions, water source, and well system. This versatility customizes your filtration system to match your needs and enhance performance.

Catalytic Carbon

- Reduces hydrogen sulfide and chlorine
- Filters dissolved organic compounds
- Exceptionally high capacity and efficiency

Turbidex

- Removes turbid particles by both physical and electrostatic adsorption
- Light-weight material capable of high flow rates

Calcite

- Naturally occurring white marble media
- Neutralizes acidic waters to prevent damage to fixtures and plumbing

GreenSand Plus

- Reduces iron, manganese, and hydrogen sulfide
- No need for a pre-filter
- No lengthy startup periods

Birm

- Highly efficient iron and manganese removal
- Durable media for a long life span
- Handles a wide temperature range
